

## Sharp's Dryland Pasture Mix

A premium mixture of introduced cool-season grasses for the Great Plains States and Intermountain Region. The mixture is made up of drought tolerant, dryland forage grasses. This mix is excellent for moderate spring grazing and fall pastures. Also works for weed control and soil stabilization in erosion control areas.

- 20% Slender Wheatgrass
- 20% Smooth Brome, Lincoln
- 20% Dahurian Wildrye
- 15% Intermediate Wheatgrass, Oahe
- 15% Tetraploid Perennial Ryegrass, Faithful
- 10% Orchardgrass, Profile

*Drill rate: 20-25 lbs. / acre*  
*Broadcast rate: 30-35 lbs/acre*

## Sharp's Foothills Mix

A mixture of both cool and warm season grasses adapted to elevations from 3000 to 8000 feet. Provides natural cover and soil stabilization in dryland situations.

- 25% Crested Wheatgrass
- 20% Mountain Brome
- 15% Annual Ryegrass
- 15% Hard Fescue
- 10% Kentucky Bluegrass
- 5% Arizona Fescue
- 5% Little Bluestem
- 4% Blue Grama
- 1% Sand Dropseed

*Drill Rate: 10-20 lbs. / acre*  
*Broadcast rate 20-30 lbs./Acre*
