To whom it may concern,

I currently use the WaterSavr Evaporation Control Product in our irrigation lakes at La Quinta Country Club. The product is very easy to apply and does not affect the aesthetics of our waterfeatures after it completely spreads over the surface of our lakes.

Water conservation is an important issue in La Quinta and all of southern California. We are very interested in environmental stewardship as well as saving money on water and electric bills. I would recommend WaterSavr Evaporation Control Product to any other Superintendent interested in adopting cost-effective, water conservation methods.

Sincerely,

A handwritten signature in blue ink that reads "Tim D. Putnam".

Tim Putnam  
Golf Course Superintendent  
La Quinta C.C.
